PD Cath

Inspired By Nature For Better Living

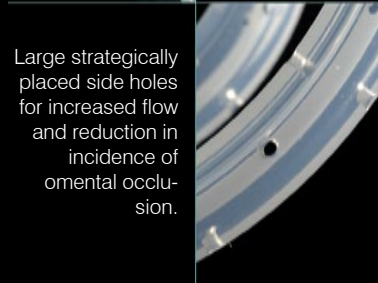

Curled end for a more gentle delivery into the body.

One piece female luer adaptor.

Single or double "fluffy" cuffs allow secure tissue in-growth to prevent infection.

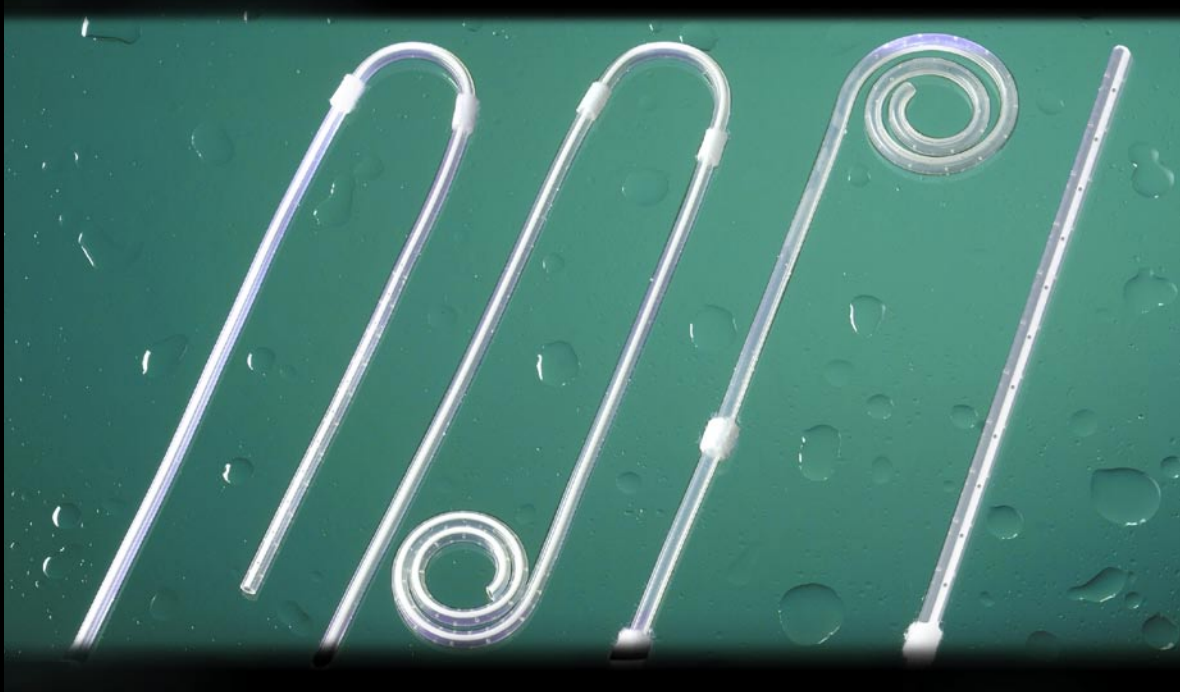

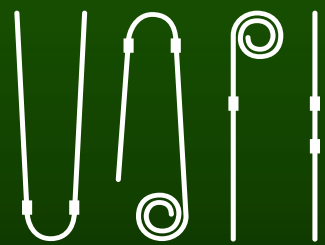

Large strategically placed side holes for increased flow and reduction in incidence of omental occlusion.

Our complete line of Peritoneal Dialysis Catheters are available in multiple designs, lengths and configurations, providing a complete solution.

The full series of PD Catheters have a low incidence of complication, with reduced infusion "Jet Effects", decreased pericatheter leaks, and lower

infection rates. Together, with a complete line of insertion and catheter accessories, Medcomp's PD Catheter line provides Total Access.
